

HERMETIC Newsletter – News in the new year

With this newsletter, HERMETIC-Pumpen GmbH wishes you a good and successful start to 2022.

We look forward to working with you and also to the possibility of a personal conversation. Be it at HERMETIC, for a visit from our sales representative at your place or at one of our planned [worldwide exhibition participations](#).

We face what is to come with great confidence and commitment. Stay healthy and take a little time for our first newsletter of 2022.

Sebastian Dahlke
CCO – Chief Client Officer

HERMETIC develops sophisticated canned motor pump for diesel desulphurisation

HERMETIC-Pumpen GmbH, as a leading manufacturer of sealless pumps, the specialist regularly develops canned motor pumps for diesel fuel desulphurisation units. For example, HERMETIC supplied a canned motor pump with a flow rate of 1,000 m³/h and a delivery head of 65 m for of a Chinese refinery. The high system pressures and temperatures prevailing during the desulphurisation process require the highest safety and reliability of the equipment used. The hermetically sealed HERMETIC pump, extensive measuring and control equipment as well as rigorous tests and inspections not only guarantee the plant operator a safe pump solution with high availability. The decisive factor to the refinery was HERMETIC's expertise and experience with the complex challenges of large industrial oil and gas plants. In addition, the pump specialist with a joint venture provides on-site support to manufacturing plants and service offices in China.

New partner in Norway

We are pleased to announce a new partnership in Norway.

PG Flow Solutions has for almost 40 years supplied pump and pump systems to the marine and offshore industries globally. The company also provides proprietary solutions, systems and products for companies within aquaculture, maritime industries, energy sectors and land-based process industries. The company's headquarter and manufacturing facility is located in Sande, Vestfold, Norway.

PG Flow Solutions and HERMETIC Pumpen have recently landed its first joint contract. PG Flow Solutions has been contracted to deliver two hermetically sealed pumps to an undisclosed newbuild LNG facility. HERMETIC looks forward to working more together on those kinds of projects.
